

## Digital Corona Team Coaching is an option for:

- Changes for employees because of home office working
- Plus / Minus after some months of home office working
- Retaining personal contacts to colleagues, employees and clients has become very more difficult
- The supervisors / managements motivation – with all different generations in the company – is optimal or not sufficient
- Reporting does not work very well anymore
- Employees become mentally detached from the company
- Your client service is like before corona, or there already is a client loss – or you haven't even noticed?
- Change Management already is a project in your company for the future to be prepared – short-termed / middle-termed / long-termed // Plan A / Plan B / Plan C
- Colleagues are retiring in the next months / Changes within the company are for sure
- Digitalisation is becoming daily business, also after Corona – ensure sustainability
- Personnel development is even more important than before for HR departments
- The full return of all employees back to the office during Corona will still take time for different reasons
- Virtually leading of employees in different locations of a company
- The training can also be performed by MCU with the aid of networking colleagues to handle bigger groups

For Digital and Live Coaching you can contact Peter Mischke by MCU in Bad Homburg / Region of Frankfurt.
